Application Datasheet:

## Activity Filter for SuperOffice Sales & Marketing

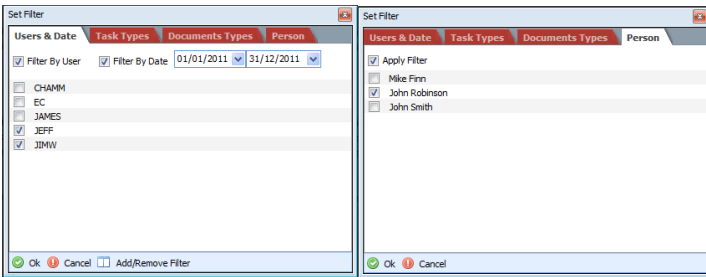

SuperOffice has some pretty smart filtering and ordering tools in the Activities tab, but sometimes there is just too many interactions to look through to find what you're looking for. Activity Filter from Redcastle overcomes this by introducing a wide range of additional filtering options.

### Date range and owner

The first of the filtering options in Activity Filter is a date range (from - to) and the owners of the activities or documents that you want to filter by.

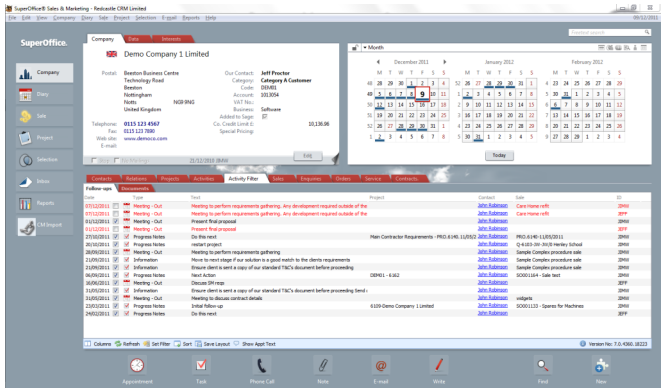

### Task and Document Types

The filter tool allows very specific Activity types and Document types to filter by, making the resultant lists far more precise.

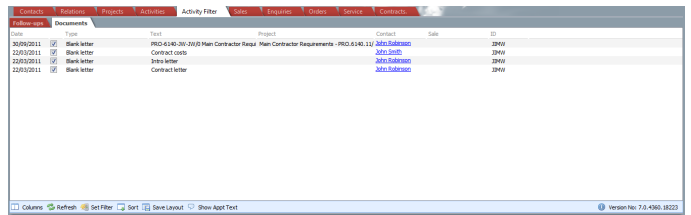

### Contact filtering too!

In addition, there is an option to filter by the customer Contact with whom the Document or Activity is associated, the list of contacts available in the Person tab is populated from the current company card in SuperOffice.

### Show text option

In the Activities list showing the filtered Activities the "Show Appointment Text" button when clicked will display all of the text from the Activity Description tab, reducing the need to open an activity to see the contents.

### Document List

Records in the filtered list of documents can be double clicked to open the standard SuperOffice document dialog box to access the document.
